

Coil Winder TD4T

The Model TD6-4 is a quality built, heavy duty, single head bench winder, controlled by a well-proven microprocessor unit with a memory capacity capable of storing 1000 programmes.

Each programme controls:

- Start position
- Winding width and wire diameter
- Number of turns
- Acceleration and deceleration
- Winding speed and direction
- All machines are equipped with a fail-safe brake and polycarbonate guard

Variations in mechanical specifications are offered; for example:

- With or without traverse
- With or without tailstock
- Low speed, high torque gear motor
- More powerful drive motor
- Foot pedal speed control
- Multiple wire guides
- Long machine bed to customer's requirements
- Foil/strip support table option
- Tooling to suit customer's specifications
- Jog pedal to assist taping, etc.
