

Coil Winder TD5

This machine is a heavy duty, floor standing, single spindle winding machine, made to customer specification regarding winding length and diameter of swing. It is controlled by a well-proven microprocessor unit with a memory capacity capable of storing 1000 programmes.

Each programme controls:

- Start position
- Winding width and wire diameter
- Number of turns
- Acceleration and deceleration
- Winding speed and direction

These machines are powered by a d.c. motor up to 1.5 kw; a step-down gearbox is fitted if required. Maintenance-free HTD belt drives are used throughout, and build quality meets *CE* requirements.

Variations in mechanical specifications are offered; for example:

- With or without traverse
- With or without tailstock
- With or without foot pedal control option
